## BEYOND: The Astonishing Story of the First Human to Leave Our Planet and Journey into Space

STEPHEN WALKER

New Adult Nonfiction

629.45 WAL

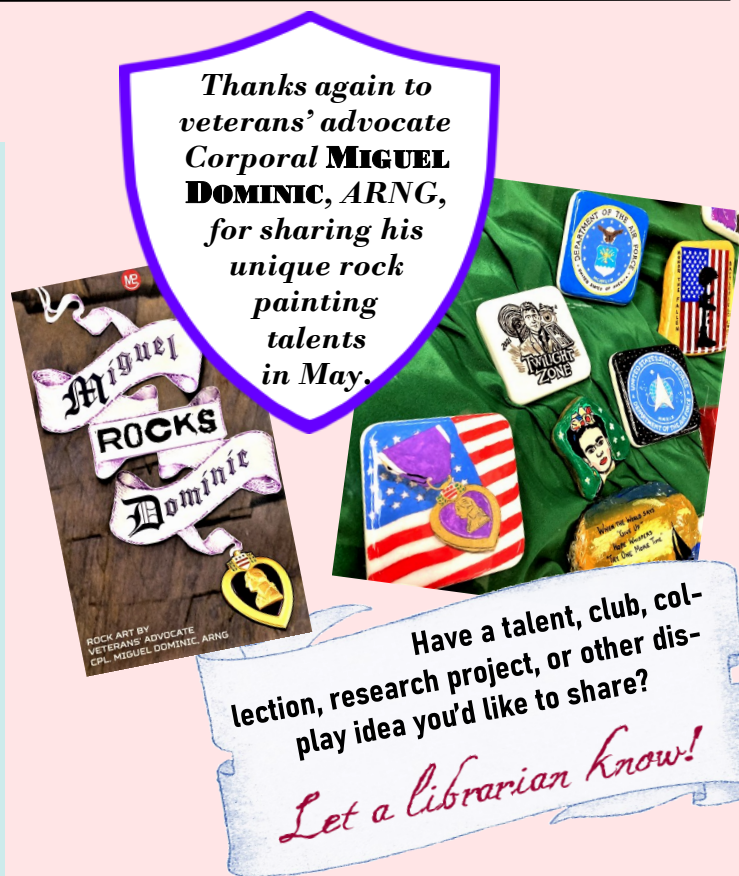

"Earth is the cradle of humanity, but one cannot remain in the cradle forever." Konstantin Tsiolkovsky, Russian rocket scientist, 1911.

*Beyond* uncovers the astonishing events that led to the USSR's conquest of space on April 12, 1961, by cosmonaut Yuri Gagarin's orbit of the earth, just 23 days before the United States' first manned space flight. Through extensive research and interviews never before published, the author highlights the fascinating parallels and fierce competition between the USSR and US Cold War space programs- the Soviets under deep cover and the Americans in the world's media spotlight. The personal and unique stories of this appealing Russian cosmonaut, Gagarin, and his comrades will have readers cheering for their success.

## MPL presents Eric Suess, Director extraordinaire!

Eric Suess has been the MPL Director since 2011. He is active in the American Library Association, where he is serving in his fourth term as an elected Councilor At-Large. He also serves as an elected delegate to OCLC, and is active in IFLA (International Federation of Library Associations). He is especially interested in the areas of Advocacy and Intellectual Freedom. Outside of libraries, Eric is an avid puzzle and trivia fan, and has been an active member of The Learned League and The National Puzzlers' League. He has acted in, directed, or otherwise been part of well over fifty theater productions. He and his wife Karen have two adult children, two cats and a very exuberant puppy.
